Ganesh	Splitting the expenses among friends staying in shared accommodation such as rent, utility bills etc.	Split wise application	1. Makes easy for posting the expenses. 2. It avoids multiple calculation which are done manually.	1. The expenses posted by others are uncategorized and well organized 2. No alerts generated when the expenses are not paid by end of month or end of period.	1. One should be able to pull the report of expenses [like bank transactions] when searched with date range. 2. One who owes the money should be notified about the pending balance by month end.	20	Male	Diploma in Civil Engineering	
Shweta	Homework notifier and tracker for kids in school – my niece studies 3 rd grade in India. She maintains a separate book for noting the homework from all the teachers, which	The Homework Application	Attractive User interface	1. Application only allows to add task for yourself but not by teacher. 2. Does not establish the communication between teachers and	1. Develop a mobile application where teachers will be allowed to create a classroom group. 2. Teachers will have the	35	Female	Home Maker	

	<p>will be referred by parents after school and parents take care of getting it completed from her before due date. Some time kids miss to take note of homework or noted home works will be not understandable by parents in which case the getting homework completed will be a challenge.</p>			<p>parents on regular basis.</p>	<p>admin rights so they can moderate who joins the classroom.</p> <p>3. Teachers will have all the rights to post the homework details, due date.</p> <p>4. Once the homework is created, parents in the classroom app will be notified about the homework.</p> <p>5. Parents will be allowed to mark the status of homework and share the reason in case it was not completed.</p>
